

GET BACK TO BUSINESS *FASTER!*

As a water-based acrylic, **Ramuc® DS Acrylic™** offers advantages over traditional solvent-based paints as it can be applied to damp surfaces as well as previously painted chlorinated and synthetic rubber substrates. **DS Acrylic** is especially ideal for commercial pool applications as it offers a shorter drying time, allowing pools to be filled within three days after the final application of paint, and lasts a full season of commercial use.

- ✓ EXCELLENT SOLUTION WHEN SHORT DOWN-TIME IS CRITICAL
- ✓ WATER-BASED FORMULA IS COLOR-FAST & UV RESISTANT
- ✓ VOC COMPLIANT EVERYWHERE IN THE USA & CANADA
