## RAMUC INTRODUCES EPOXY PATCHING COMPOUND

Greensboro, N.C., - Ramuc® Epoxy Patching Compound, a cutting-edge two-part epoxy that's designed to deliver superior performance in a variety of applications. With its advanced formulation, this new product allows for durability, versatility, and ease of use in repair and maintenance tasks.

Epoxy Patching Compound is engineered to address the challenges of large cavity filling and bonding with its thick, non-sagging formula. It does not run or shrink, allowing users to complete repairs in a single application. The compound's unique properties ensure a strong, lasting bond to a wide range of materials including epoxies, polyester resins, fiberglass, metals, and concrete.

This product offers exceptional flexibility. It can be sanded, painted, machined, cut, filed, planed, drilled, and tapped, making it ideal for an extensive range of applications such as filling, filleting, forming, fairing, and fastening. Its low odor formula enhances user comfort, while its resistance to chemicals ensures reliable performance in challenging environments. Whether working above or below the waterline, Epoxy Patching Compound is safe and effective.

"Ramuc Epoxy Patching Compound is vital for our pool paint customers because it delivers a strong, durable repair solution that ensures a seamless surface, allowing for superior adhesion and extending the life of pool or deck finishes. Its extremely user-friendly cartridge packaging eliminates waste associated with traditional 2 component epoxies." Marty Greenwell Business Development Manager

**About Ramuc Aquatic Coatings:** Ramuc is a leading manufacturer of specialty coatings that has been trusted for over 90 years to protect and rejuvenate swimming pools, spas, slides, and more. We have and will continue to keep customer service as our primary goal along with our commitment to producing high quality coatings.
